

WG-V Portable Instrumentation

- SOH recommendations from Prague 2015
- How to better track in meta-data stations that move (e.g. deployments on glaciers or oceans gliders)

Action Item 2017.01: Identify a small working group to develop proposal for SOH channels.

WG-V Portable Instrumentation

- OBS data
 - Accounting for OBS clock drift
 - Current state of OBS integration into data centers and future paths / roadblocks
 - Standard methods / filters for decimating seismology data

Action Item 2017.02: Send list out of current methods used by various parks to correct clock drift for feedback.

Action Item 2017.03: Put together a small working group to develop a short decimation summary paper. Suggested that it would be useful to engage the ObsPy group.

WG-V Portable Instrumentation

- WG-V web presence
- Survey of available methods for creating & verifying StationXML

Action Item 2017.04: Send out request for new and updated content for the Web Page (QC tools, stationXML, inventory)
